

06

NEW FACILITY OPENING

18 Surgical Rooms Staffed in 45 Days

Renowned academic teaching hospital — Level I Trauma, Burn, Transplant Center

THE CHALLENGE

In August 2024, this teaching hospital's Anesthesia Medical Director identified two simultaneous needs: a shortage of 12+ anesthesiologists and CRNAs for an existing high-acuity program, AND a new surgical outpatient center opening in 4 months that needed full staffing.

THE ARK SOLUTION

- 1 ARK and CRNA Together leveraged regional anesthesia network for dual-scope recruitment
- 2 45+ clinicians screened for both existing program and new outpatient center requirements
- 3 Over 95% of submitted clinicians accepted for medical staff privileges
- 4 All 18 FTE points of service filled within 45 days — new center opened on schedule

18

surgical rooms filled daily

45

days from engagement to full
staffing

95%+

clinician acceptance for staff
privileges

THE PAYOFFS

- ✓ Both programs — existing shortage and new outpatient center — fully staffed on deadline
- ✓ Academic scope of practice maintained; clinicians committed to teaching hospital requirements
- ✓ Trusted partnership built with hospital anesthesia leadership; ongoing collaboration and communication established
- ✓ Educational opportunities preserved while clinicians contributed to training future healthcare professionals
